WHAT'S NEW AT ASHBRIDGE, ASHMILL AND COSWAY

Welcome back to the Ashbridge, Ashmill and Cosway (AAC) newsletter, keeping you up to date with what's happening with the development.

Since the last newsletter at Ashbridge Street the concrete frame has been partially constructed up to the new roof level. Following some additional unforeseen works, the remainder of the concrete frame is now progressing, and will reach roof level during October. The construction of the new external envelope has also begun, with the scaffolding being constructed first to enable safe access to the new elevations.

At Ashmill Street, the external brick walls are under construction.

In September, the construction of the new roof will begin, followed by the installation of the new windows.

At Cosway Street, we have completed piling and temporary works have been installed, which has released the excavations down to the new basement level with construction of the new basement slab underway. This comprises a total of nine concrete pours (a very big basement). Once a portion of the new basement slab is complete, the vertical walls & columns will be constructed from basement to ground floor level.
