

Green Spine: what's next

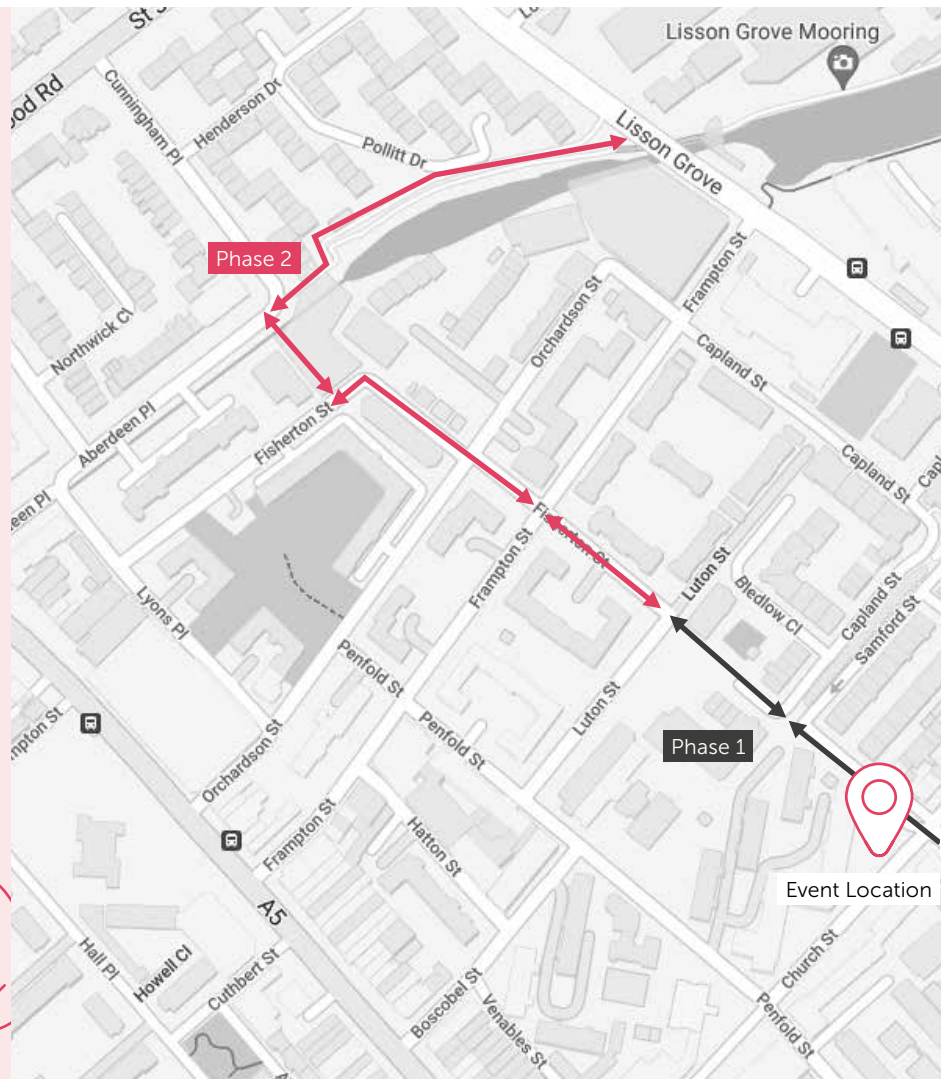

Help us shape the designs for the next phase of the Green Spine, part of the Church Street regeneration programme.

The first phase of the Green Spine is being built, and Westminster City Council is working with **B|D Landscape Architects** to design the next phase.

This will create a link between the Luton Street development and Regent's Canal. The map shows the indicative area for the Green Spine route.

The Green Spine will create places for you to:

- Spend time outdoors
- Connect with wildlife and nature
- Play, grow and explore!

We want to hear your ideas about where the Green Spine should go, what should be included and how it could work.

23 September 2021, 10am – 3pm

Join us at the regeneration market stall on Church Street Triangle

29 September 2021, 6.30 – 7.30pm

Join us at our online event. Get a link to the event by emailing
